

Redkik

Per shipment cargo insurance

Software as a service
Modernizing cargo insurance

Turning a Problem to an Opportunity

Around half of all global shipments currently go uninsured, why?

- *High upfront annual estimated fees*
- *Slow processes for per shipment bookings*
- *High administrative load from manual claims handling*
- *Inefficiencies and lack of flexibility e.g. restricted commodity types*

Are your customer's shipments fully insured?

Would you like to earn additional revenues and differentiate from your competitors?

Redkik solution

With Redkik as your technology provider, you can distribute per-shipment insurance.

Redkik integrates with your current booking system, for giving an immediate quotation. No need to key in info twice.

Redkik's automated solution provides a 1-click, on- demand response.

- Offer extensive on-demand cargo insurance rather than spend money on expensive and complex annual policies
- Per shipment pricing based on actual value and needs
- Insure the shipment instantly at the time the customer books their freight
- Redkik's solution is easy to implement fully integrated or as a standalone solution where booking system is offline
